I had a ton of fun playing through this game. The controls are tight, the level design is fantastic, and the soundtrack is great. I never thought collecting carrots could be this much fun. I would definitely recommend, especially for the price.. Not too difficult of a song. Great for beginners.. You play a character who's just graduating ninja training. Have a personal quest to find out what happened to your missing parents. The main conflict is between a brutal lord and a pacifist lord. Supporting the brutal lord will make you wealthy+powerful, whereas supporting the pacifist lord is seen as more honorable path. Two ninja companions, a nice guy and a vengeful girl. Seems like there's gonna be a part 2, but this is a complete story.

Pros:

- Need to pass a ninja graduation test right off the bat. It's like solving a puzzle.
- Pick your gender and name after passing ninja graduation test. Kinda lets you test out your character.
- Enjoyed the fight scenes, especially the final fight. Very tricky.
- Total of 4 missions you will go on, vary in length.
- Multiple opportunities to switch sides, become a double agent, unlock alternate options by working for other characters.

Cons:

- Didn't like how all your stats started at 50. They go up the more you use them, neglecting a stat will lower it slightly.
- There's a romance option that asks how you feel about a character you literally know nothing about and haven't meet in the story yet.
- Disappointed by conclusion to 2nd mission. So much lead up, a complication that affects nothing, then you succeed.
- Everyone tells you not to mention this to anyone, but there's never an option to mention it.
- A lot of decisions ask: Do you do this by yourself or with your friends? Do you let your friends take the lead or do you take the lead? These just didn't seem like real decisions to me.
- Allies, enemies, and wounds stayed at 0 throughout. Not sure how these work or affect the game.
- A relationship bars for other characters would have been a good addition.
- Stats didn't really seem to affect the game.

Overall:

-I enjoyed it, but I'd pick up on sale. Hoping for a part 2.. Awesome Game Must Have. A great game for horse lovers! Especially those who're fed up about catching butterflies...

- + Most facts and scenarios are well researched.
- + Easy to learn and understand
- + Good variation among the missions
- +++ Unlike most other horse games, this one isn't cutified. There are no missions about petting cute bunnies , catching butterflies etc. The focus is more reality oriented than that.

- The zoom is limited. One needs to be able to zoom out more while building.
- The herd composition doesn't matter, which is quite unrealistic. In real life stallions don't get along with each other if there are mares in the same herd.
- The missions are quite few and simple. The playerbase is nearly non-existent. I go to search for a game and there are 4 other people online at all. Do not buy it for the extra online options, as there are no players to experience them with you. Might be fun with friends, though.

The purchased story is not worth it at full price. It's fun to run around piloting a mech, but the story's only about 2 hours long, and is essentially just a VR rail shooter. It's also extremely cliché. The bad guy is super bad, the good guys are super good.

Maybe get it on 50% off or something, try out the multiplayer, it's free after all. Overall it's a decent enough game, mechanics wise.

Not to recommend, not now and not for even 8\$

This game is a pile of ... something. Wish i could refund and buy me a sixpack of beer with the money but i cant :-(. Damn Freaking Hard but Addicted game!!

It blow me everytimes when i dead and restart from level 1 but I LOVE IT!

AWESOME!. Plays well even on an older machine, cloud save is good, letting me to switch between phone and computer.

Hasn't crashed :) nice an stable so far for a launch day release.

Selection of ships is a little fiddly, but not unworkable. Hopefully the developer will tweak it so it's more user friendly, their previous game's selection worked well, so hopefully this one will be improved.. 100 V 10 Ricardo Milos

100 V 10 Anime girl

100 V 10 Meme

Do you want to be greeted by Ricardo Milos when booting the system?

Or an anime girl in a bekin?

Then this program is for you.

I'd add - U Got That "Ricardo Milos - dance". For a long time I was reluctant to buy one, mostly because my computer was hooked to my TV set already and I didn't feel the Steam Link would be useful. Still I told myself it could be interesting to have one in store just in case. Time went on and the Steam Link went out of production just when I realized I finally needed one, having moved my computer to another room.

I found a used one on an online store and bought it for more than what I could've paid had I decided to buy one on Steam earlier... But no matter, that little device is amazingly effective. I hooked it to a Gigabit Ethernet port, connected my Steam Controller receiver then my TV set to the HDMI port and Bob's your uncle.

It works wonders. Even with an average network connection it still works very well with minor latency. All my Steam Controller profiles were kept within Steam and I could reuse them though the Link.

Resolution & compression are dynamically adjusted for the available bandwidth to provide the smoothest experience possible and I have to say it's really amazing how well that works.

I'm pretty sure it could even be used to remotely play through the internet provided you forward the right ports on the router, but you'd need a solid uplink connection for this to work reasonably well enough.. This game is really colorful and blocky. I wonder why more people havent played it????
